TD5SPY

IT'LL HELP GET YOU THERE
(AND BACK).

ABOUT THE TD5SPY

INSTALL & SETUP

Plug the unit into the OBD2 port under the steering wheel and the hard part is done! Install the app on your ANDROID smartphone and start the app. The app connects via bluetooth and begins monitoring.

ITS THAT SIMPLE

THE MONITOR

The system primarily focuses on monitoring the engine to keep you informed on its running status. Engine parameters can be configured in the Settings page to set up alerting for when things get out of range.

Out of range parameters are displayed in orange or red depending on severity. In addition, the unit speaks to you to let you know what going wrong.

So you can focus on the road and let the TD5SPY take care of monitoring the engine performance, diesel uage and consumption.

OUR HISTORY

I've owned a number of Land Rovers over the years and it has been my passion to restore them to reliable service.

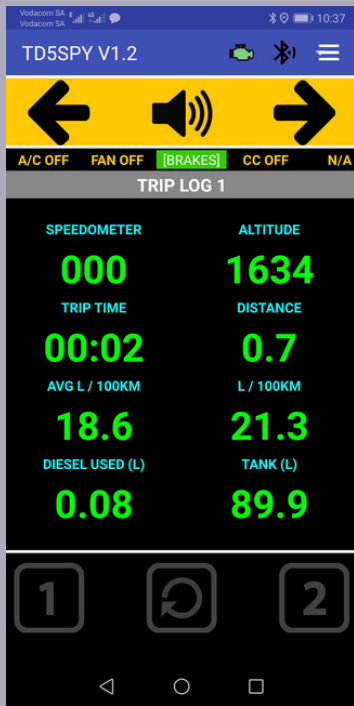

My previous vehicle was a Defender 300TDI on which I did my first engine rebuild.

I then bought a Discovery 2 TD5 and did a full rebuild on the engine. Wanting to understand how well the engine was running, and the prohibitive cost of existing solutions, prompted me to implement my own.

I am thrilled to pass this cost effective solution on to you. It may just save your engine one day!

The leading TD5 engine monitoring system out there.

Hey ... it even speaks to you!

TD5SPY DISPLAYS

EASY NAVIGATION

To navigate between the different screens, click on the arrows on the top of the screen.

INFORMATIVE PAGES

The TD5SPY has 8 pages that display:

- Cruise Monitor (sensor configurable)
- Instrument Monitor
- Fuelling Monitor
- Trip Logs (X2)
- Injector Balances
- Fault Monitor
